

Outdoor Products

- ▶ Outdoor waste bins
- ▶ Divorced waste collection
- ▶ Several volumes
- ▶ Collection in outdoor space
- ▶ Collection of recycling products
- ▶ Circular sustainable Products
- ▶ Customer specific waste bins

Dulce series

50

70

Properties:

- Contemporary functional bin
- Durable and affordable
- Modular replaceability
- Volumes: 50-70-100 litres
- Reuse existing brackets

100

Applications:

- Public space
- Shopping areas
- Sports areas
- Company areas
- Scholen areas
- Etc.

Miro: Waste separation in existing infrastructure

Waste separation in outdoor area

- More waste fractions
- Keep number of collection points
- Larger volume: 42L → 75-110L
- Reuse braces

Miro, Proven against bird nuisance!

Bird-free throw-in
Effective prevention of litter!

Birds keep sightlines and escape routes open, so they avoid narrow overhangs. It looks like the roof continues past the opening, shielding sight lines and escape routes.

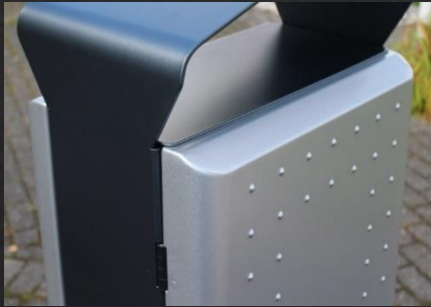

Birds grab around the landing site. The sloping front surface makes it difficult for a bird to find a grip.

Miro year-end closing and bag dispenser

End-of-year closing
Standard and always at hand!

Circular economy our Outdoor products

- **Renewable** materials† Use of bamboo, natural pigments
 - **Refurbish**† adaptive change inserts system for changing collection logistics → futureproof
 - **Reuse**, After taking back, usable parts can be used again for new products
 - **Repair** by design for disassembly
 - **Remanufacture** with again 'in house' powder coating process
 - **Recycling** of materials used
-
- Worldwide **the first Cradle to Cradle garbage bin**
 - **Lifecycle design strategies** as a development tool: **LIDs Wheel**
 - From waste to raw material: **ECHOING**, subsidy for preventing litter in public spaces

Circulareconomy ofDiftar

- Our partner/producer Lune, **Participant in green deals**, a contractual commitment to creating circular products!
